

## **Elite Auto Tune To Feature Mercedes S550 with SPD-Smart Windows At Miami Auto Experience**

Miami, Florida and Los Angeles, California – February 5, 2010. This weekend, Elite Auto Tune, a leading U.S. distributor of some of the world's most exclusive and exotic luxury automotive products, will feature an SPD-equipped Mercedes S550 at the Miami Auto Experience on Saturday, February 6, 2010 in downtown Miami, Florida. The SPD-Smart windows were manufactured by American Glass Products (AGP), a licensee of Research Frontiers Inc.

The Miami Auto Experience is an exciting event that showcases professionally tuned vehicles and accessories before what is expected to be a large number of attendees including auto enthusiasts, celebrities and media professionals, especially because of this weekend's football game. For more information about the event and to purchase tickets, visit <http://www.miamiautoexperience.com/tickets.html>.

The Mercedes S550 to be shown at the Miami Auto Experience event has Vario Plus Sky aftermarket SPD-Smart windows manufactured by AGP. AGP is dedicated to the production of high technology glass for a wide range of applications, and today is one of the largest specialty glazing manufacturers in the world. AGP uses SPD-Smart film produced by Hitachi Chemical, a licensee of Research Frontiers, to produce their Vario Plus Sky products such as those for the Mercedes S550.

SPD-Smart(TM) products use patented SPD film technology developed by Research Frontiers. With the touch of a button or turn of a dial, users can instantly and precisely adjust the tint and privacy of windows, sunroofs, glass roof systems, skylights and other products. Automated adjustment of SPD-Smart products also is available using sensors or timing or other control systems. SPD films can be combined with other glazing materials, such as materials used in armored glass, to meet a wide range of end-product requirements across many applications.

For more information about Elite Auto Tune, visit [www.EliteAutoTune.com](http://www.EliteAutoTune.com) or call 800-353-1132. Information about AGP's Vario Plus line of automotive aftermarket products can be found at <http://www.agpglass.com/agp-tech-varioplus1.htm>.
